PROFESSIONAL SUMMARY

Frontend Developer with around 2 years of hands-on experience across commercial and internship roles, building responsive, user-focused web applications for healthcare, banking and esports projects. Skilled in React.js, TypeScript, Redux and Tailwind CSS, with practical experience delivering reusable component libraries, REST API integrations and accessible, mobile-first interfaces in Agile teams using pull requests and code reviews. Most recently built a production UML diagram editor during a 2026 frontend internship. MCA in Computer Applications. Full right to work in the UK; no sponsorship required.

TECHNICAL SKILLS

Languages & Frameworks: React.js, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, jQuery

Frontend Practices: Responsive & Mobile-First Design, Component-Based Architecture, Reusable UI Components, REST API Integration, State Management (Redux), Web Accessibility (WCAG basics), Cross-Browser Compatibility, Debugging, Performance Optimisation, SEO

Tools & Platforms: Git, GitHub, npm, VS Code, Vite, Vercel, Mermaid.js, CodeMirror, Browser localStorage

Ways of Working: Agile/Scrum, Pull Requests & Code Reviews, Daily Stand-ups, Sprint Planning, GitHub Issue Tracking, Progress Reporting

Basic Understanding: Next.js, Jest, React Testing Library, Figma, Chrome DevTools

Other: SQL, MongoDB (basic), Python (Capgemini certified), GDPR & Data Confidentiality

FRONTEND EXPERIENCE

Frontend Developer Intern | 3S Knowledge, UK (Remote) *Feb 2026 – Mar 2026*

- Built a UML sequence diagram editor for the ProcessPro platform in React.js and TypeScript, taking it from initial setup through to production deployment.
- Engineered real-time synchronisation between the code editor and visual canvas, with drag-and-drop editing, UML fragment support, zoom controls, saved sessions and PNG/SVG export.
- Designed a reusable UI component library in TypeScript and Tailwind CSS, standardising the look and feel across 3+ internal tools.
- Enhanced the usability of internal reporting tools through responsive UI improvements and targeted debugging.
- Collaborated in an Agile team through GitHub-based workflows, raising pull requests and taking part in code reviews, contributing to daily stand-ups, sprint planning and issue resolution, and presented weekly progress to my manager.

Frontend Developer (Freelance) | TrumpCode Pvt Ltd (Remote) *Jan 2022 – Oct 2022*

- Developed the frontends of two client web applications in React.js and JavaScript: a banking management system (TrumpCore) and a healthcare platform (AroyaLife).
- Built mobile-first interfaces integrated with REST APIs and backend services to deliver dynamic, data-driven features.
- Carried out systematic testing, debugging and issue resolution across multiple releases.

Frontend Developer | WebSoulLabs, Kerala, India *Apr 2021 – Dec 2021*

- Delivered responsive websites using React.js, JavaScript, HTML and CSS within a cross-functional development team, including the GM4 esports tournament platform.
- Carried out frontend debugging, UI improvements and on-page SEO optimisation.

KEY PROJECTS

Personal Portfolio Website *React.js, Vite, Vercel*

- Designed, built and deployed a responsive personal portfolio (live site), improving it in phases for security, responsiveness, accessibility and content.

TrumpCore – Banking Management System (TrumpCode) *React.js, JavaScript (ES6+), HTML, CSS*

- Built frontend modules for user and role management, customer account handling, transaction reporting, a real-time audit ledger panel and an administrative dashboard.

AroyaLife – Healthcare Application (TrumpCode) *React.js, JavaScript, HTML, CSS, SCSS*

- Built patient/doctor interaction interfaces, appointment scheduling, online consultation, an integrated messaging/notification component, medical history tracking and a high-contrast layout to support accessibility.

GM4 – Esports Tournament Platform (WebSoulLabs) *React.js, JavaScript, HTML5, CSS3, SCSS, MongoDB*

- Developed the tournament booking and team registration flows, a player check-in wizard, a visual tournament bracket management tool, and user authorisation with team dashboards, all within a fully responsive UI built from scratch.

ADDITIONAL EXPERIENCE

Healthcare Assistant (Part-time) | Caldwell Grange Care Home (Runwood Homes), Nuneaton *Dec 2022 – Present*

- Record task completion logs and shift notes in Person Centred Software (PCS) every shift, keeping digital records accurate and up to date.
- Handle confidential resident information in line with GDPR and escalate changes promptly to senior staff.

Career Break (Childcare) & Self-Directed Learning *Oct 2022 – Jan 2026*

- Kept frontend skills current through independent study and personal projects covering the React ecosystem, REST APIs, Git workflows and modern CSS tooling, alongside part-time care work.

EDUCATION

Master of Computer Applications (MCA) | Federal Institute of Science and Technology (FISAT), India *2015 – 2018*

Bachelor of Computer Applications (BCA) | Adithyakiran College of Applied Studies, Kerala, India *2012 – 2015*

CERTIFICATIONS

Certified Web Developer (Python & Ruby on Rails) | Capgemini, via EduBridge *Aug 2021*

Front-End Web Development – HTML and CSS | Great Learning *Aug 2021*

GDPR Foundations | Measured Collective *Jul 2026*

Data Analytics Programme (in progress) | NextLeap Education *2026*
